

JESUS WORE DICKIES

NEVER BELIEVE

## SELFHELP

When today you reach out for your glass  
And you pick it up so time will pass  
Just remember these few words my friend  
You're not alone

When your life throws you a curve to the left  
And you think that it is your last breath  
Just remember these few words my friend  
You're not alone  
This room is empty but they still are watchin you  
So you do what you gotta do in this life for you

I hate being positive so positive I'll be  
I hate being so positive so positive

When it's quiet and you start to think  
About all the things that are sinkin  
Just remember these few words my friend  
You're not alone  
This room is empty but they still are watchin you  
So you do what you gotta do in this life for you  
Just try to hold on for tomorrow  
And ya gotta just remember that  
they're still watchin you

## ANTFARMS

When I walk to the bus stop  
The ants on the wall again  
Ants like stars up in the sky  
When we go antfarms will rise

The bridge it burns it burns it burns  
The radio knows it knows it knows

Cause you hate me

When we met back tomorrow  
When I went it will begin  
The feelings are now bad then  
Sinking up I start to land

Cause you hate me  
Cause I want you

And I'm climbin up the bridge  
And now climbin down again  
Even odd 77  
At the top it is even

## CIRCLE

A circle is just a square  
With rounded edges

Life goes in circles and it's ok  
Goes in cycles I just have to say  
Just hang on for another day  
Soon you will find you will find your way  
Lookin for advice well I have none  
So few times around the sun  
Radio is playin the same old song  
Try to smile and have some fun

I can't tell you what's goin on  
Try to pretend that nothing's wrong  
Radio is playin the same old song  
Take 2 pills and your life goes so  
Thinkin of your eyes how we are one  
So few turns around the sun  
Find the circle let the patterns run  
Goes in cycles as it goes on

Over here pass it

Thinking of your eyes

## NEVER BELIEVE

Never believe  
Never believe what others say  
Because ya try not to do what others do  
Never believe what others say  
Because ya never believe  
Ya never believe what others say  
And ya try not to be  
Ya try not to be what others be  
Because you're

Happy... Mad... Angry... Glad...

Never believe  
Never believe in promises  
Because ya try not to lie like others do  
Never believe in promises  
Because ya never believe  
Ya never believe in promises  
And I promise ya this  
I promise ya this I'll never leave  
Beacause you're

Do you hate me?  
Said I'm sorry  
Just promise that you wont leave  
Forget about me  
Seasons change  
People change  
What they say  
Life goes on in steady waves  
Life goes on in hurricanes  
Tidal waves and distant games  
Life goes on in hurricanes  
Not really

Gonna believe I'm gonna lift my mind  
Gonna believe I'm gonna take easy

## 2 PILLS

Ya gotta get up  
You've got to get up

Geronimo  
Down again  
I'm gonna fly  
In my dreams again  
But now it's kind of windin down  
And I'm thinking I'm just a clown

Now over here pass it over here  
Pop 2 pills in the morning  
I'm not sick but I still take my pills  
And my scissors start to cut I bleed  
All the falling pieces in my  
My open wings are broken I see

How come you tell me what's goin on  
Just when I was startin to feel alright  
Now you're telling me that it's all wrong

Just sleep  
Another day  
Another way  
Just sleep x3  
Another day  
Cause the revolution  
isn't gonna happen tonight

What you do lie and deceive  
Hand me an apple like Adam from Eve  
When you talk you make me want to sleep

## WHATCHA GONNA BE?

When you say  
All those things about us and it  
Does not help you  
It's not true  
Those words thrown out there ensure it  
Comes back to you

Whatcha gonna be?  
Whatcha gonna do my friend?

I'm on top  
You cant bring me down so don't try  
What I do best  
Words can kill  
So watch what you say to me cause  
It's not a test

I don't know where I'll go  
When I go away  
I don't know where I'll go  
When I go  
When I go away

When you say  
Desperate things they fill me up I'm  
All full of lies  
I will kill  
Gonna find the answer if I'm  
Going to survive

## TUNNEL

The farther I go the deeper I get  
I'm up to my knees  
Soon I will be at the end of the tunnel  
And I will believe  
Never believe what others say  
Try not to pay what others pay  
Soon I will be at the end of the tunnel  
And I will believe

## ADAT OI

Start start start start start start  
Because you love me is no reason to cry  
How come when you really don't know me?  
How come you do this when you really can't help me?

Light through the leaves as we watch butterflies  
You always tell me what I really wanna hear  
Tell me your reasons and then I cover up my ears

Space between only grows deeper with time  
Wine to blood when the heart wants to divide  
Red lines that form roots entwined up in your mind

When feelings take over there's nowhere to hide  
Ahhh  
No more stop talk stop thought stop stop stop stop stop stop

## OCEAN BLUE

My love for you is like the ocean blue  
But why why why  
Did ya keep on hassling me  
with your silly troubles  
We tried to work'em out  
But ya kept on runnin away  
runnin away runnin away from me

## ALL OUR LIVES

All our lives now  
All these things here  
We're here for such a short time  
Watch every step  
Only time knows

Whats the sky need?  
Angels cry, SING!  
"We're here for such a short time"  
Watch every step  
Nmbers add on

Scissors cut me  
Scars want to heal  
We're here for such a short time  
Watch every step  
Every soul leaves

## STAND NOW

See him stand now  
See him fall down  
See him hangin on your wall  
Nothing can stop him at all

See me stand now  
See me fall down  
See me at my funeral  
Just like a freak at a carnival x2

Eating from a roasted apple  
Drinking from a glass half empty

1, 2 Juno  
3, 4 Porthole  
5, 6, 77 will not go  
You might bleed tonight you know

See them stand now  
See them fall down  
See the people look so peaceful  
Soon it will be the end of us all x2

## WHY?

This will help you while you sleep  
It will keep your soul at ease  
Have you felt anything?  
Why?

You're unable to relax  
There's a problem with your act  
If the truth bothers you  
Lie!

Everything's the same  
Till you can solve the sequence  
Till you can solve the sequence of your life  
The patterns will change  
To keep the answers secret  
To keep the answers secret from your mind

Here's an apple you can eat  
I just picked it from the tree  
Don't you like paradise?  
Why?

It's a secret...
